

Total Leads

2,240

Total Revenue Attributed

1,127,223.09

Finding: campaign_roi must use the true total spend per campaign (Σ campaign_spend across all its leads), not $\text{AVG}(\text{campaign_spend})$. campaign_spend is a genuine per-lead amount (\$500-\$15,000 range within one campaign), not a duplicated campaign-level constant, so dividing total revenue by the per-lead average inflated ROI ~350-400x. Recalculated correctly, overall campaign ROI is -90.9% and every campaign loses money on this metric (least-bad: NovaPulse Launch -83.7%; worst: NovaEdge Awareness -97.7%). Campaign ranking is unchanged - only the magnitude/sign were wrong.

Lead-to-Close Conversion Rate

18.39%

Finding: Partner Referral drives 60% of total attributed revenue (\$676,977 of \$1,127,223) - more than 3x the next channel (Direct Mail, \$211,067).

Business impact: Revenue is heavily concentrated in one channel. If Partner Referral relationships weaken, overall marketing-driven revenue is exposed to a sharp drop.

Recommended action: Protect and grow the Partner Referral program (dedicated account management).
